At TWF's Girls Go Tech Interschool Day 2026, 100+ students, parents, school and corporate partners, leaders from education, government and the community joined together to reimagine STEAM (Science, Technology, Engineering, Arts, and Mathematics) in the age of AI.

Here are our key takeaways from the day:

★ STEAM knowledge is irreplaceable in the age of AI

The 'GEN Our Voice' AI Competition showcased student creations with image generation software, highlighting the collaborative possibilities of AI automation and human imagination. A strong foundation in STEAM knowledge can support students in exploring new opportunities, connecting AI use and development with creativity, purpose and real-world impact.

💡 Hong Kong's young women are ready and eager for digital innovation

Our partner school booths featured student-led STEAM projects that were interactive, innovative and expressive. Young female talent in Hong Kong possess the curiosity, data literacy and drive to contribute to the AI workforce. Empowering them is critical to building future-ready systems that are inclusive and equitable. Thank you to Angelina Kwan, TWF Board Chair; Aveline San, TWF Board Member and GGT Steering Committee Member; Ada Kong, Chief Executive, State Street Hong Kong Branch for your speeches and reminding us of the continued efforts needed to spotlight young women in STEM.

💛 Role models are needed to support young women's participation in STEM

Women comprise only 22% of the AI workforce globally - role models are invaluable to guiding young women to emerging fields and building their confidence in the STEM industry. Thank you to Jeanne Lim, Co-Founder and CEO, beingAI; Louise Pang, Director of Environmental Design & Engineering, Walt Disney Imagineering Asia Ltd; and Kingston Kwan, Principal, St Catharine's School for Girls for the insightful career advice in the student-led panel, moderated by [Yat Tung LAU](#). Thank you to our corporate volunteers from State Street, [BlackRock](#), [HAECO](#), [CLP](#) and [Qube Research & Technologies](#) for joining our Human Library and mock interview sessions on the day.

A big thank you to all the sponsors who made GGT Interschool Day 2026 possible: Lead Sponsors State Street and IMC; Associate Sponsor, [Bloomberg](#); Sponsor Partners [BlackRock](#), Capital Group, Cathay, [CLP](#), Empower, [HAECO](#), Jane Street, [Qube Research & Technologies](#); Scholarship Scheme Sponsor Morgan Stanley; Technology Partners AiTLE, Classroom STEAM AI, Google, The Hong Kong Association for Computer Education, HKT Education, Meta, Octopus InfoTech Ltd; Supporting Partners Hong Kong Government Education Bureau, CityU Apps Lab, Equal Opportunities Commission.

Let's continue to support young women to move beyond mere participation, and champion their growth as creators, innovators and leaders shaping the future of AI and technology.
